

# Handheld Needle Detector Knitting Textile And Apparel Detector (TY-20MJ)

## ◆ Product Introduction:

This type of equipment department handheld deft type needle detectors, alias portable needle detectors, hand-held needle detector, handheld metal detectors, etc. Is the principle of magnetic fields, can effectively detect the broken needle etc. tiny iron items.

## ◆ Product Parameters:

1. Power: 9V fold battery (6F22ND) (Battery in Option)
2. Detecting Sensitivity : Minimum detecting Fe 0.8MM; diameter Fe 1.2mm can reach 10mm height  
Diameter 0.7x20 broken needle can reach 50mm height
3. Weight: 232g (without battery)
4. Size: 145(L)\*65(W)\*45(H)mm
5. Packing: 160\*80\*60mm / 350g

## ◆ Application:

Clothing, buttons, zipper, textile, shoes, hardware, chemical industry need to detect the place, metallic impurity homework auxiliary large needle detector detection non-conforming accurate ferromagnetic metal impurity needle. but also can be used to detect areas contain iron metal accessories such as cobalt nickel whether forbidden by environmental protection attestation of metal impurity. Enhance product quality.

- 1, the instrument of medicine, food, can ferromagnetic material inspection on of chemical raw materials
- 2, the instrument of wood, wall, can the nails, internal stage desk reinforced, pipe existence examination.
- 3, this instrument can also on human and livestock, etc, cuts, crushed industrial injury areas such as the inspection, check its internal whether ooze harmful iron residue.
- 4, this instrument can also be used for border shut the whistle inspectors to be seized personnel's hidden weapon, the rapid
